

Community Service Volunteer Opportunity for Teens Junior Counselors: Ages 15-17

A great volunteer opportunity to gain valuable teaching experience in the field of nature and science! Junior Counselors earn community service hours while working directly with campers under the supervision of a mentor counselor. Topics include but are not limited to: natural science, engineering, technology, astronomy, and group and team building games. Teaching is through hands-on and inquiry methods that encourage exploration, self-directed learning, and stewardship of the natural environment.

Junior Counselors must commit to a minimum of two to three weeks June 24 –August 23, 2019. A day-long orientation/training session is required. Applications are located on our website at www.ecotarium.org and are due by March 31, 2019. If you have any questions, contact Teri Lynes, Volunteer and Community Engagement Coordinator at: volunteer@ecotarium.org
