

Shrewsbury Public Schools

**State of the District
January 8, 2020**

State of the District

Our schools provide an excellent education to our students and great value to our community.

Indicators of excellence

- High levels of academic achievement, comparable to peer districts, within the top state in the nation for public education.
- Superb performances by teams and individual students across the range of co-curricular activities, earning regional and state honors and championships in academic competitions, the performing and visual arts, and athletics.

Excellence for all students

Superb educators & strong supporters

- Our educators, support staff, and leadership team continue to do extraordinary work every day.
- Our School Committee provides leadership that creates the conditions for students and educators to thrive.
- Our parent community provides outstanding support, for their own children specifically and for our schools generally.
- Our support from the town government and the community-at-large is also strong.

Staying focused on our vision

Strategic Priorities 2018-2022

Learning environments where everyone's success matters

We are making strides toward becoming a district where “all means all” when it comes to ensuring that all students are getting what they need to succeed; it will take additional time and effort to get there.

Enhanced well-being of all

We have taken steps toward addressing stress and other social, emotional, and behavioral health issues, but we have much more to do.

StrESt Less

Love More

~ SHS SWAT Team

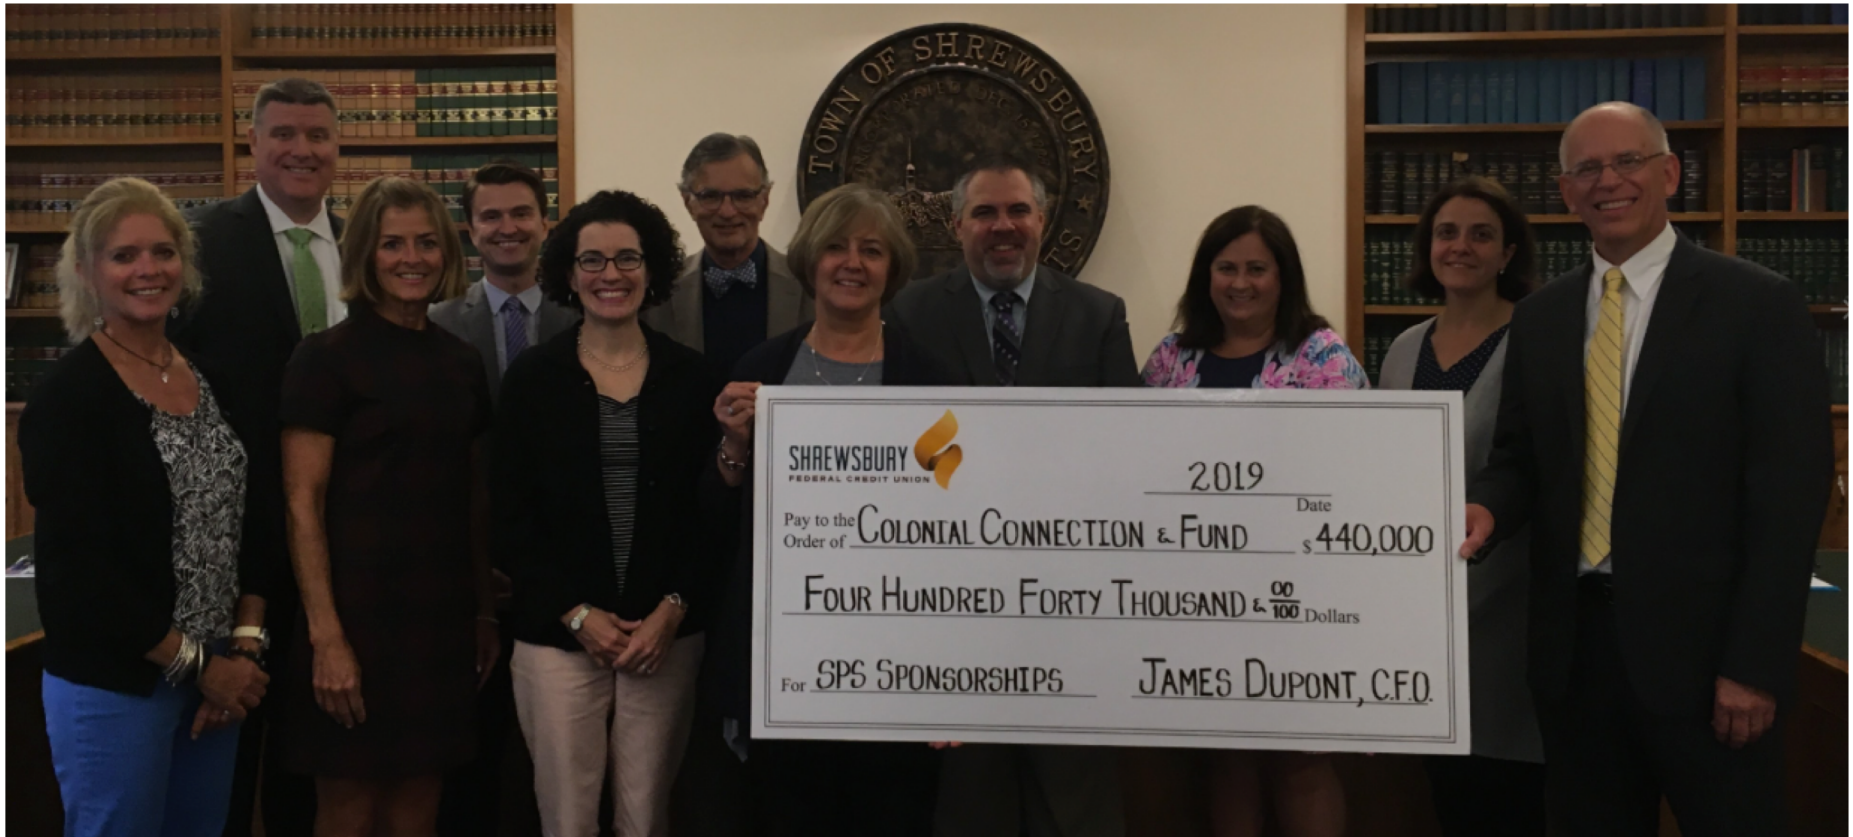

Connected learning for a complex world

We have increased opportunities for students to participate in project-based and other authentic, connected learning experiences that help develop the skills they will need to be successful citizens, and we are making plans to do more.

Space and resources to support effective learning

It is critical for our district to have the space and resources necessary to achieve what the community expects of us.

Challenges ahead...
