**State of the District  
January 23, 2019**

# **State of the District**

**We have much to celebrate, but *we have work to do* to achieve our collective aspirations for our students.**

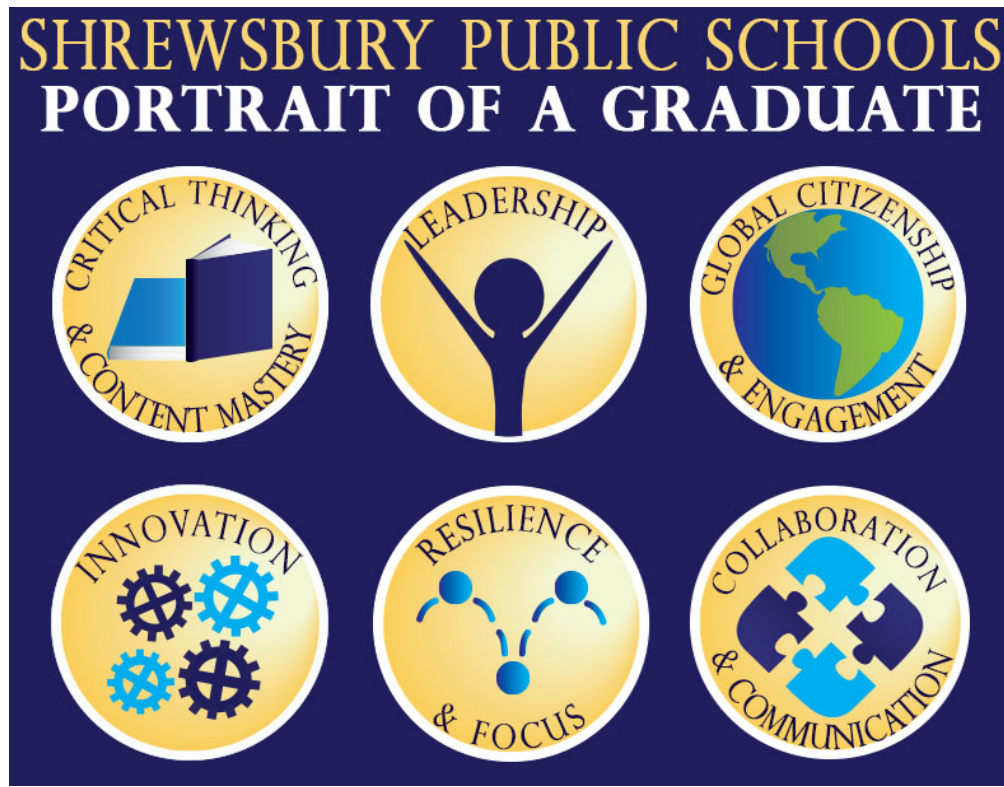

# **We have much to celebrate**

- Our students continue to demonstrate very high levels of success in traditional measures of academics, including strong performance on state and national assessments.
- Student creations and performances in the visual and performing arts continue to earn accolades, while academic competition teams (Speech & Debate, Robotics, Math Teams, etc.) and athletic teams continue to achieve impressive results.

# **We have much to celebrate**

- Our educators, support staff, and leadership team continue to do extraordinary work every day.
- Our School Committee provides leadership that creates the conditions for students and educators to thrive.
- Our parent community provides outstanding support, for their own children specifically and for our schools generally.
- Our support from the town government and the community-at-large is also strong.

**In order to achieve the vision and strategic priorities that have been established, we need to ensure that we are expending our efforts on the right things in the right ways.**

# Strategic Priorities 2018-2022

**Learning environments where everyone's success matters**

***We have work to do if we are to become a district where we can truly say that “all means all” when it comes to ensuring that all students are getting what they need to succeed.***

## **Enhanced well-being of all**

***We have work to do if we are to become a district where we can truly say that the kids – and the educators – are alright, when it comes to addressing stress and other social, emotional, and behavioral health issues.***

## **Connected learning for a complex world**

***We have work to do if we are to become a district where we can truly say that all of our students are participating in project-based and other authentic, connected learning experiences that are sufficiently developing the skills they will need to be successful citizens.***

## **Space and resources to support effective learning**

***We have work to do if we are to become a district where we can truly say that we have the space and resources necessary to achieve what the community expects of us.***
